7. There were no obstacle or boundary lights. Ten Germans were surveying near the single-track railroad siding on the western edge of the field. (3) Local residents said that the field was to be extended toward the west and northwest to twice its former size and that the entire village of Bindersleben was to be evacuated for this. (4) 25X1C 8. On b Hovember, no Soviet unit was stationed at the field. The unit previously seen there had left on 26 October. (6) Only one civilian sentry was present. Comments. On 20 September 1950 another source observed the landing of the single-engine planes, ground attack aircraft, at the field. confirmed the occupation of the field by a ground attack unit. It is believed that the ground attack regiment from Dorberitz was temperarily transferred to Erfurt. (2) The information on the presence of fuel containers in paragraph 2 is confirmed in paragraph 6 by another source. The containers seem to have arrived in orfurt-Bindersloben recently and are possibly to be installed there. (3) The information on surveying work, contained in paragraph 3, is confirmed in paragraph 7 by another source. It is possible that the field is to be extended. 25X1C The intended evacuation of Bindersleben has not been confirmed by other sources. (6) The information on the transfer of the ground attack regiment, though unconfirmed, is believed possible since another source has not observed ground attack regiments in "rfurt recently.
